

Q2 The Executive Board would like to increase the Capital Contribution (also known as the buy-in fee for new homeowners) to 6 months worth of dues. Currently, new buyers pay \$500.00 when they purchase a home in Watson Run and those monies fund the Capital Reserve Account. The reason the Executive Board wishes to make this change is to try and keep current homeowners from having to pay higher yearly Association fees.

The Association transfers 10% of our annual budget to our Capital Reserve for future community needs. As everything tends to increase, the Association will have to increase dues to adequately fund our Capital Reserve unless we make changes such as the one being proposed to help offset future costs.
